

# ELECTRONIC PRODUCTION

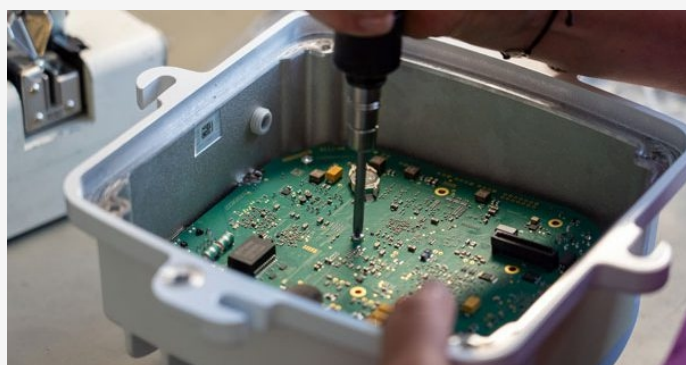

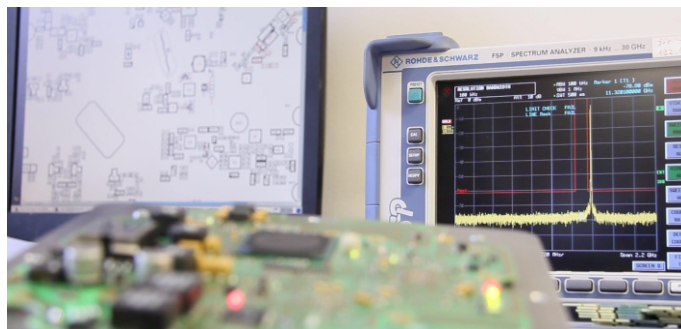

In our electronics production, we manufacture thousands of devices for wireless data transmission per year, which are among the world's best. Our expertise and equipment correspond to this. We are one of the few producers of high-frequency equipment in Europe.

Within our spare capacity, we are able to offer you a comprehensive Electronics Manufacturing Services including mechanical parts from PCB assembly and commissioning to testing and subsequent support and service throughout the lifetime of your products.

## WHY RACOM

- Own production since 1989
- All production is in the Czechia, Europe
- Consultations during development
- Specialization in RF technology

## COMPLEXITY

- Components, PCB Assembly
- Mechanical parts
- Commissioning, Mounting
- Testing

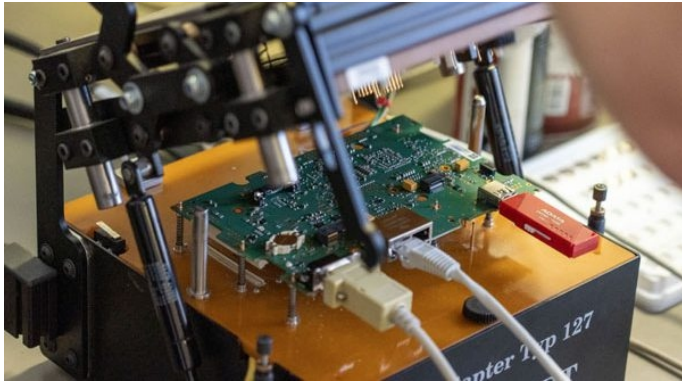

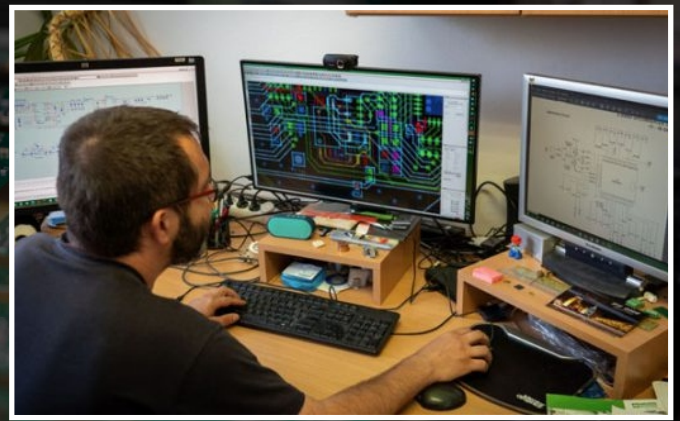

## TECHNOLOGY

- Spectrum Analyzers, Generators
- Oscilloscopes, Power supplies...
- ICT testers
- Climatic chamber

We have more than 30 years of experience in manufacturing transmitters and receivers from 100 MHz to 80 GHz. The modern parts of our devices also include network elements and state-of-the-art computers. We develop and manufacture everything ourselves in the Czech Republic, Europe. As part of the production preparation, we will be happy to share our experience with you so that the production of your devices runs smoothly.

Take advantage of the opportunity to have your equipment made in the same quality as RACOM products. Our devices have MTBFs exceeding 100 years and are installed in more than 120 countries, from the poles to the equator.

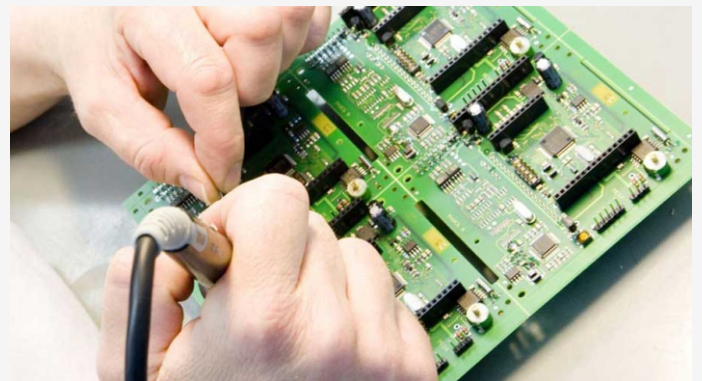

## QUALITY

- Standardized manufacturing processes
- ISO 9001, ISO 14001
- Own products with MTBF >100 years
- Installations in 130+ countries

## PRODUCTION

- PCB Commissioning
- Assembly
- Testing
- Climatic chamber

## COMPLETION

- Output control
- Packaging, Shipping
- Customs formalities
