Dears,

in this special issue of RacomNews devoted to The 4th International Conference we would like to remind you four days of agreable meetings with our partners.

During the optional and official program of conference we tried to ensure interesting and pleasant atmosphere not only for bussines meetings but for relaxation and enjoyement as well.

We hope that participants of conference got to know useful informations, they have enough of possibilities to discus their questions and that they spent pleasure time with RACOM.

Thereby we thank to our partners for their participation on the conference.

We would like to invite our partners for the next conference whose preliminary date is 5th and 6th October 2006.

The 4th International Conference

On 29th and 30th of September 2005 RACOM organized The 4th International Conference for its co-operating partners in Hotel Colorado Grand in western city Sikluv mlyn close to Nove Mesto na Morave. The official program of the conference was preceded by two-days MORSE training and individual meetings at RACOM premises from 27th to 28th of September.

30 persons from 17 countries and 18 companies have been welcomed by RACOM during these 4 days.

The MORSE training was mainly focused on practical use of MORSE system for different applications.

A new products - NetSetup, MRemote, MRouter as well as existing software tool Setr and a new version of RANEC - MORSE network centre have been introduced and practically trained.

During official program existing partners introduced their most interesting new projects. New partners introduced their companies and possibilities of potentional use of MORSE sstem in their projects.

RACOM presented new hardware and software products of MORSE system, RacomNews - occasionally bulletin and WebService - a special service for RACOM partners and big customers.

The first day of the conference was closed by dinner and western style program: bank robbery by desperados, cowboys duel - revolver shooting tournament and fashion show of western style underwear. All participants had the possibility to visit RACOM reference customers in Brno during the second day of the conference. They have visited Water distribution company in Brno (Brnenske vodarny a kanalizace) where MORSE network is used for SCADA and security system with more then 110 remote sites, The municipal transport company (DPMB) - network for fleet management with more then 670 vehicles and Public technical services (Technicke site Brno) - network for public lighting SCADA system with 318 sites.
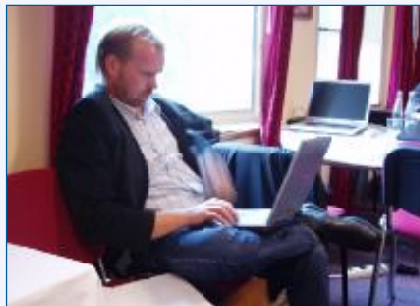

The conference was officially closed by lunch on Friday afternoon.

RacomNews

During the conference days there was very friendly and agreable atmosphere. Here is the evidence:

All participants payed attention during the presentations, they asked questions and discussed about the theme.

MORSE training has been supervised by RACOM jury. How it is comfortable to straighten the legs.

It was sometimes necessary to manage personal matters in time between the presentations.

In front of the Colorado Hotel there was prepared very interesting reception for conference participants. Thank you, nice horse!

The social evening was variegated by revolver shooting tournament and fashion show of western style underwear. A black man with silver revolver was really dangerous....

For the excursion in Technicke site - Brno it was necessary to comply with safety measures. The yellow helmets suited very well.

Even if Donnie (left) has been supervised by Arne (right), on Friday Donnie and Dominic (missing) forgot themselves in Colorado hotel. Donnie is born in Ohio, he used to run rodeo and he likes wild-west style so much. He probably still rides a horse around Western City...

Thank again to all participiants for their comming.

The 4th conference is over, vivat the 5th conference!

See you on 5th October 2006!
