Product Description:

1000M-SFP-TI is Multi-Vendor MSA Compatible RJ45 SFP (Small Form-factor Pluggable) Transceiver, operating over twisted pair Category 5 or better cable with maximum distance up to 100m. 1000M-SFP-TI operates in Industrial -45° to 85°C temperature range and has RJ45 Standard connector. RJ45 SFP support 10-1000 Mbps data rates and such applications as 10Base-T, 100Base-T and 1000Base-T. 1000M-SFP-TI copper SFP transceiver is multi-purpose module used in number of different places of today's networking. Consequently, most popular applications are Enterprise networking for LAN applications and different other networking places still using copper connections.

Product Data Sheet

RJ45 SFP Transceiver is CE/RoHS certified and it is Compliant with product safety standards. 1000M-SFP-TI Transceiver is fully compliant to SFP Multi Source Agreement INF-8074i. Consequently, it means that module is compatible with 80% of networking equipment, where is not implemented a special algorithm for protection against third party modules. However – our technical team has accumulated deep expertise in custom-encoded firmware's for RJ45 SFP transceiver in order to make it work in almost any brand equipment. We will be glad to know your requirements.
