

ELECTRONIC PRODUCTION

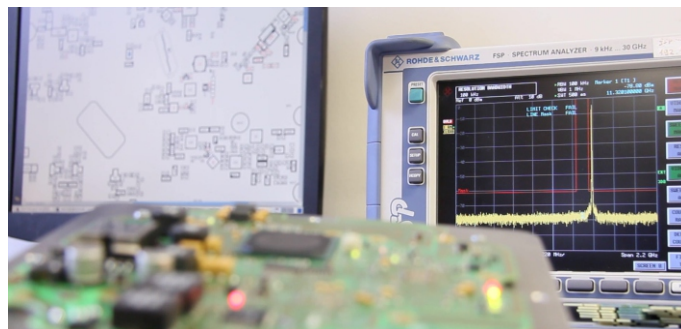

In our electronic production, we produce thousands of devices for wireless data transmission per year, which are among the world's best. Our expertise and equipment correspond to this. We are one of the few producers of high-frequency equipment in Europe.

We can offer to companies that have their PCBs mounted with us the commissioning and completion of entire products, within our spare capacity.

Technology

- Spectrum Analyzers, Generators
- Oscilloscopes, Power supplies...
- ICT testers
- Climatic chamber

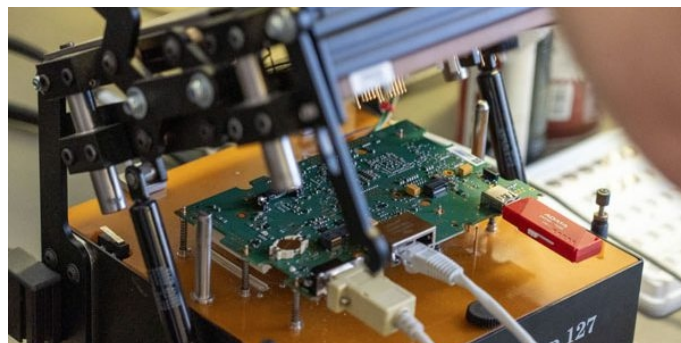

Why RACOM

- Own production since 1989
- Specialization in RF technology
- All production is in the Czechia, Europe
- Consultations during development

Quality

- Standardized manufacturing processes
- ISO 9001, ISO 14001
- Own products with MTBF >100 years
- Installations in 120+ countries

We have more than 30 years of experience in manufacturing transmitters and receivers from 100 MHz to 80 GHz. The modern parts of our devices also include network elements and state-of-the-art computers. We develop and manufacture everything ourselves in the Czech Republic, Europe. As part of the production preparation, we will be happy to share our experience with you so that the production of your devices runs smoothly.

Take advantage of the opportunity to have your equipment made in the same quality as RACOM products. Our devices have MTBFs exceeding 100 years and are installed in more than 120 countries, from the poles to the equator.

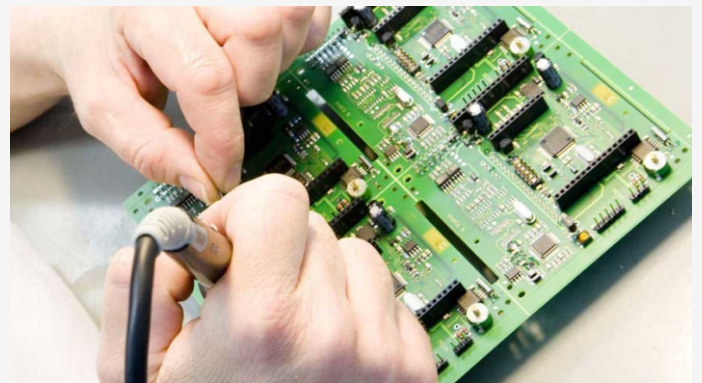

Preparation

- Over 30 years of experience
- Pre-production incl. single-purpose jigs
- We produce own electronics since 1989

Production

- PCB Commissioning
- Assembly
- Testing
- Climatic chamber

Completion

- Output control
- Packaging, Shipping
- Customs formalities
